

My Fellow Taxpayers:

We have seen Floridians pass the amendments concerning spending and taxes, working waterfronts, not being taxed on making your home safer from hurricanes, no sales tax for community colleges. As these amendments passed by the 60% required, the message should be strong to elected officials – no more.

We have watched the Supreme Court of Florida usurp our right to vote on education taxes and school choice. They serve to protect the government and education from the voters and tax payers. We all know the amendments taken off the ballot by the court would have passed. Government protects itself – who protects you? You will be attacked with more taxes and fees in the months to come. Government will not use less – they will take more. The reasons and excuses will flow as they state why they must have more and of course you must have less.

With the election of a new President and the clearly stated goals both he and the Democratic congress have set forth, hold on because we are in trouble.

From the national level to the local level, we are faced with uniting and fighting or surrendering. Join us or any group of Americans that allow you to stand up to having our money stolen from us in the name of government.

A handwritten signature in black ink that reads 'Lee Sullivan'. The signature is fluid and cursive, with a long horizontal stroke extending to the right.
